Larkspur Assurance — Fraud Indicators & SIU Referral (Travel)

Document ID: FRD-03

Version: 3.0

Effective: 1 January 2026

Owner: Special Investigations Unit (SIU)

1. Purpose

Indicators help us decide which claims need a closer look. An indicator is not proof of fraud. Most claims with one or two indicators are genuine. Never decline a claim, or tell a customer they are suspected of fraud, because of indicators alone. Only SIU may make a finding under policy condition GC.2.

2. Scoring

Add the weight of every indicator triggered. Each indicator counts once per claim, however many times it occurs.

Score	Band	Action
0–24	Green	Proceed normally
25–39	Amber	Proceed; flag for post-payment QA sample; record indicators in Evidence Pack
40+	Red	Do not pay. REFER to SIU with Evidence Pack

3. Indicators

ID	Indicator	Weight
F1	Policy purchased ≤ 7 days before departure, or ≤ 3 days before the first incident	20
F2	Material inconsistency between the claimant's accounts (claim form / statement / claimant translation) and independent evidence (police report, carrier, medical)	15
F3	Theft reported to police more than 24 hours after discovery	15
F4	Duplicate receipt or duplicate line item on the same claim	10

ID	Indicator	Weight
F5	Claim includes a single gadget or valuable claimed at > £500	5
F6	Two or more travel claims by the same insured in the previous 24 months	15
F7	Receipts that are handwritten, lack a merchant tax ID, or have round-number totals for multiple items	10
F8	Proof of ownership is dated after the claimed incident	30
F9	Bank details on the claim differ from the verified payee account on file	25
F10	Claimed amounts on the claim form exceed the receipts by > 20% in any section (after removing duplicates)	10
F11	Medical documents from a provider that cannot be verified (no registration number, no address)	20

4. Notes for assessors

4.1 F2 applies when the difference is material to the decision (e.g. whether property was unattended, when an item was bought, who travelled). Minor wording differences are not material.

4.2 F4 is triggered by the duplicate itself; it does not matter whether the claimant explains it.

4.3 F6: count only claims made in the 24 months before the current claim's notification date, using the policy record's claims history.

4.4 Record every indicator considered (triggered or not) in the Evidence Pack, so reviewers can see what was checked.

4.5 An indicator relating to a line item that is being declined on coverage grounds still counts toward the score.
